FYI from the UAC
Have you heard about the new requirements for changing majors in NSM? Students now must have a 2.00 overall GPA as well as a 2.00 math and science GPA. Depending on the department, certain math or science courses also must be completed prior to changing to a major within NSM. Check out the requirements in the undergraduate catalog for more information, and ask your advisor if you have questions!

Campus Resources: Facebook Page
Students spoke and we listened— as suggested by a student advisory panel last year, we launched an NSM Facebook page this fall! The UH College of Natural Sciences and Mathematics (NSM) page is student-focused, and provides students with information about opportunities on campus, important dates in the academic year, and celebrates UH successes like football wins and student achievements. Another great feature of our page is that students can connect with one another and with the college in a quick and easy way; whether you're trying to form a study group or wondering when an organization is meeting, the Facebook page can help you get the information you're looking for. Visit our page at www.facebook.com/uhnsm and like us so you can get all of our postings and get better connected to NSM!

Organization Spotlight: Allied Health Professions Society (AHPS)
The Allied Health Professions Society at the University of Houston is a non-profit organization. They provide current information about allied health professions and professional schools through workshops, field trips, guest speakers, advice, and literature. Their mission is to help students find the best career path in the health field that best suits their interests. If you are interested in any of the health professions and want to know more about what they offer throughout the year, please go by their office, email them or visit their website to see upcoming meetings and events. (Brochures and membership applications are available in their office and at their main bulletin boards outside of 107E.)

Allied Health Professions Society (AHPS)

Are you interested in showcasing your organization in the UAC Update or on Facebook? Please contact Kialyn Vendell at kyendell@uh.edu.

Meet Your Advisor: Heather Moore

Name: Heather Moore
Majors I Advise: Biology and Biochemistry
Educational Background: I have a Bachelors of Science in Communications (Public Relations track) from the University of North Florida, and am currently working on completing my Masters of Education in Instructional Technology at the University of Houston.
Likes: Practically any combination of cheese and carbs (chips & queso, mac & cheese, etc), BIG dogs, and traveling. Oh, and SLEEP!!
Dislikes: Spicy food, allergies, and Houston traffic
Favorite thing about UH: One of my favorite things at UH is graduation! Knowing that I had a small part in helping my students get to graduation is a great feeling.
You May Not Know: I have 3 BIG dogs at home (actually, you probably DID know if you have ever seen me for advising because of all the dog photos at my desk!). Sydney is a 7-year old Shepherd mix, Charlie is a 2 ½ year old yellow lab, and Riley is a 10 month old black lab.
Accomplishment I’m most proud of: Being the first person in my family to graduate with a Bachelors degree. It wasn’t always easy figuring out what I needed to do for graduation, but thankfully I had an extremely helpful academic advisor that helped guide me through the process. My goal, now that I am an academic advisor, is to help my students navigate their way to graduation with as few bumps in the road as possible.
